

# Universal tubs

your doorway to independent bathing

## The Ultimate Home Spa Experience

Transform your bathroom into a sanctuary  
of safety and style.

Universal tubs  
your doorway to independent bathing

# Engineered for Safety, Designed for Comfort.

**1) Molded-In Soaking Seat:** Features an integrated, ergonomically contoured seat designed to provide a comfortable, upright soaking position at a safe height.

**2) Wide-Swinging Watertight Door:** Engineered with a robust seal and a wide-opening mechanism to allow for maximum interior room and effortless entry.

**3) Low-Step Entry Threshold:** An ultra-low profile entry point specifically designed to minimize the risk of trips and ensure accessibility for users with limited mobility.

**4) Steel 10-Point Support Frame:** The tub is built upon a heavy-duty, stainless steel frame with 10 points of contact and adjustable leveling feet to ensure total stability and support for up to 1,000 lbs.

**5) Premium Acrylic Finish:** Our high-gloss, non-porous acrylic is reinforced with fiberglass, creating a scratch-resistant surface that stays bright and is easy to maintain.

# Precision Fit for Your Bathroom.

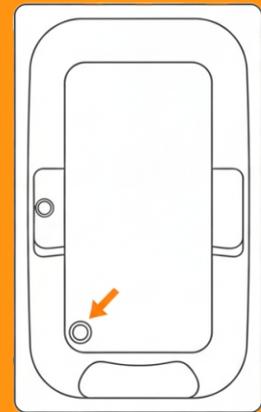

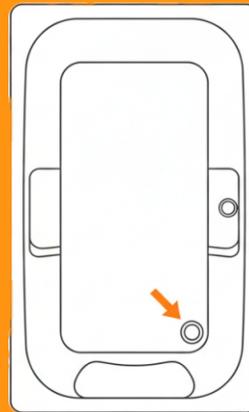

To ensure a seamless installation and long-term reliability, our walk-in tubs follow these standardized technical specifications:

**1) Standard Lengths:** Available in 59", 63", and 67" models to accommodate various bathroom footprints.

**2) Standard Widths:** Designed in 29", 31", and 33" widths to fit through standard doorways.

**3) Drain Configuration:** Choose between Left or Right hand drain placements to align with your existing home plumbing.

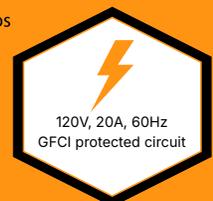

**4) Electrical Requirements:** Systems typically require a dedicated 120V, 20A, 60Hz GFCI protected circuit for safe operation.

INCOMING POWER

Standard GFCI 110V, 20 Amps

**5) Weight Capacity:** The installation site must be capable of supporting a total weight of approximately 1,000 lbs, accounting for the tub, water, and bather.

# Luxury Meets Peace of Mind.

**1) Chromotherapy (If Equipped):** Specially designed underwater LED lights illuminate the water to enhance your mood and create a serene bathing atmosphere.

**2) Aromatherapy (If Equipped):** An integrated aroma canister allows you to add your favorite fragrance; when the blower system is activated, it fills the air with aromatic bliss.

**3) O3 Ozone (If Equipped):** Available on whirlpool and combination systems, this automatic ozonator produces ozone to safely and effectively sanitize your bath during use.

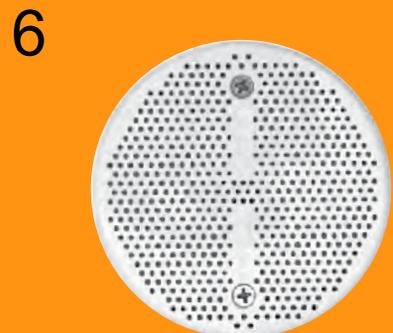

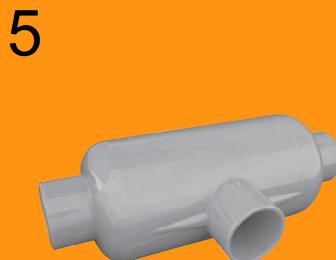

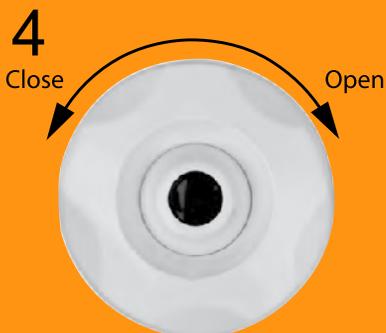

**4) Star Jet:** These adjustable jets allow you to control direction and pressure—simply turn clockwise to open flow or counter-clockwise to close it.

**5) H.E.E.T. (If Equipped):** An eco-friendly system that maintains water temperature using the kinetic energy produced by the water pump, removing the need for a traditional heater.

**6) Safety Suction:** A standard safety feature on all models that allows water to return to the pump; it includes an automatic shutdown sensor if the suction is ever blocked.

# Our Commitment to Your Independence.

**Industry-Leading Warranty:** We stand behind our craftsmanship. Every Universal Tub comes with a comprehensive warranty on the shell, finish, and lifetime coverage on the door seal.

**Customer Care Team:** Based in the USA, our dedicated support team is available to answer any questions regarding maintenance, operation, or technical support.

**Professional Installation:** Our network of certified installers ensures that your tub is fitted perfectly to your home's plumbing and electrical systems with minimal disruption to your daily life.

**Easy Maintenance:** The premium acrylic finish and Ozone sterilization system are designed to keep your tub sparkling clean with just a simple wipe-down—no harsh chemicals required.
